DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 7, 13 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weiperth in view of Edman et al.

Weiperth shows an actuation assistance apparatus having a spout actuator 16, base member 7 and lever portion 8. Weiperth lacks the lever portion having top and vertical flange. Edman et al show an actuation assistance apparatus having a lever with a top 22 and vertical flange 42 for strengthening (column 7, line 60). It would have been obvious to one of ordinary skill in the art to have substituted the Weiperth lever with a top flange and vertical flange as taught by Edman et al as an alternative equivalent means for actuating a pressured container and for strengthening a lever.

Allowable Subject Matter

Claims 4-6, and 14-16 are allowed.
